Here Is What Transpired At Monday's Meeting Of The Palm Beach County Commission

Assurance that repaving of SR A1A between Lake Park and Jupiter would be done as soon as possible after July was given by the County Commission to 150 signers of a petition presented at Monday's board meeting.

Judson Miner, Jupiter Chamber of Commerce, in presenting the petition, told the board that "we were led to believe this repaving work was to be done by the State Road Department this year and we feel it should not be delayed."

Roy Michael, Jr., acting as chairman in the absence of Kenneth P. Foster, told Miner that the SRD had removed this item from its 1956-57 budget when it was recently amended, but that it will appear in next year's budget which begins this July.

The SRD is presently obtaining bids etc. in preparation for this particular job 'so they'll be ready to go soon after the budget goes into effect this July', Michael said.

In other action the board: Emphasized its intention to keep open the South Ocean Boulevard strip north of the Palm Beach Ambassador following receipt of a letter from that hotel's attorney report the road's deterioration. Assistant County Engineer George Frost was instructed to ascertain repairs needed on the road.

Approved a motion of Commis-

sioner Paul Rardin that no detention cells be placed in the new Glades county office building as requested by Sheriff John Kirk, after Rardin explained "We can continue to use the Belle Glade jail for this purpose." Sheriff Kirk agreed and withdrew his request.

Instructed County Attorney Harry A. Johnston to review the charter of the Village of North Palm Beach, incorporated in 1956, whose performance bond expires Feb. 17. Grover Herring, the group's attorney, asked the commission to review this matter to determine whether the Village must renew its bond. Mr. Johnston will report at next week's meeting.

Made part of the legislative record various letters from dairies endorsing an act incorporating the West Palm Beach mild code throughout the county.

Awarded to contractor John B. Tschirgi the new County Children's Home building after engineer Frost reported his bid of \$259,275 was lowest and best.

Assured the Belle Glade Town Council, who inquired, that the Legislative Act of 1945 requiring all junk yards to be fenced from view is in effect now, and moved to investigate how many of the county's 29 junkyards were complying with this law.

Cinematic Chatter

By Malcolm Millar

Hello everybody! Natalie Wood is perhaps the "most wanted" young actress to come upon the Hollywood scene in years. Fresh from her triumph as 'feminine lead' to the late James Dean in "Rebel Without a Cause", for which she won an Academy Award nomination, Natalie has acquired a following that is unusually large for one so tender in years. Actually though, at the ripe old age of seventeen, she has already garnered more film credits than many actresses more than twice her age. The brown-haired, brown-eyed actress has been acting in motion pictures, in television and on the stage since she was four years old, when she made her debut in the film "Happyland." Later she appeared in "Tomorrow Is Forever" with Claudette Colbert and Orson Welles. Miss Wood has won many top roles and acting honors. In 1947, Parents Magazine selected her as "the most talented juvenile motion picture star of the year."

In 1949, she was chosen "Child Star of the Year" by the Children's Day National Council of New York. Her portrayal in "Miracle on 34th Street" won her a Boxoffice award. Natalie made her debut at Warner Brothers (in the "Silver Chalice.") She has decided that instead of going to college as she had formally planned, she will devote herself fully to an acting career. See you at the movies—Mal.

Phone Co. Wins Suit Against Union For Property Damage

The Communication Workers of America Union has paid Southern Bell Telephone Company \$315,000 for physical damage inflicted on the Company's facilities.

Payment by the Union was the outgrowth of a damage suit filed in 1955 by the Company. An agreement to this effect was reached by the Company and CWA attorneys, Southern Bell District Manager E. F. Reddy announced yesterday.

In the suit filed May 31, 1955, in the Davidson County, Tennessee, (Nashville) Circuit Court, Southern Bell charged the Union with "a pattern of violence" designed to destroy telephone facilities and interfere with communication service to the public in Alabama, Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, South Carolina and Tennessee.

The suit, seeking \$5,000,000 for punitive as well as actual damages, alleged that the Union, its members and others joined an "unlawful combination and conspiracy" to damage property. The suit said the Union "embarked on a program of wanton, wilful and malicious misconduct and property damage," including the use of dynamite, fire arms and cable cuttings.

In a separate action growing out of strike violence, the CWA recently agreed to accept without further hearings an order by the National Labor Relations Board against the International Union and 27 of its Locals for unfair labor practices during the 1955 strike. Subsequently, the NLRB issued such an order (on January 28, 1957). The matter was consummated this morning when an order dismissing the case was entered in Davidson County Circuit Court following agreement between the parties.

Still Working For Four Year College

A request from the Boca Raton Town Council for financial help from the County Commission to obtain Federal releases for the Boca Raton Air Base, new site of the proposed University of South Florida, was approved by the board in spirit with the exact amount of financial aid subject to board approval.

Commissioner Lake Lytal reported that the Boca Council had requested a sum of \$2,500, half of the maximum figure the council estimates will be needed to present its application for Federal and CAA release of the field. The council would pay the other \$2,500.

Lytal also reported that the council has hired an expert in obtaining such Federal release who is determining the actual cost of these release. In order to cut down on this figure, the board has offered its engineering department, Lytal said.

Commissioners emphasized their willingness to "cooperate fully" with the town council so that the titles can be cleared and turned over to the State for the university site.

Pick your savings target and shoot straight for it!

A home . . . financial security . . . a business of your own. Important savings targets like these cost money—a substantial sum—and more than most of us have. But here's a sure way for you to score a bull's-eye and walk off with the big prize you want.

The secret of saving is system. And the simplest, most automatic saving system ever devised is the Payroll Savings Plan. Best of all, you do *more* than save through Payroll Savings. You *invest* your money, too, and make it grow. Here's how it works:

Tell your company pay office how much you want to save each week. Then each pay period that amount will be put aside for you *before* you have a chance to spend it. Your money will go automatically into U. S. Series E Savings Bonds.

Because Savings Bonds earn good interest—3% compounded semiannually when held to maturity (9 years and 8 months)—they're soon worth much more than you've invested in them. And your Bonds will continue to pay this same good interest as long as 19 years and 8 months. *That means a return of up to 80% more than you originally paid.*

And remember this. There's no guesswork or chance about the Payroll Savings Plan. It's absolutely safe and sure. Invest just \$7.50 a week. In 5 years you'll have Savings Bonds worth \$2053 in cash; in 10 years, \$4448.

Even if you've never been able to save before, this plan is guaranteed to work for you. So sign up today for Payroll Savings where you work—or invest in Bonds regularly where you bank.

For the big things in your life, be ready with U. S. Savings Bonds

Labor Department Warns Farmers Of Child Labor Laws

MIAMI—Some farmers in the Deerfield Beach and Pompano Beach area, according to Clem J. Denicke, investigation supervisor of the U. S. Labor Department's Wage-Hour Field Office here, have been reported to be illegally using children to help harvest the bean crop.

Warning that the federal law carries stiff penalties for persons found to be wilfully violating it, Denicke pointed out that the important consideration in the employment of children in agriculture was for the farmer to "be sure that no child under 16 is hired during hours when school is in session."

"The law is liberal", he added, "in allowing these youngsters to work on farms—picking beans, tomatoes, or other crops—but it is strict in requiring that they not be hired during school hours."

Denicke said that investigators from his Miami office were currently visiting farms in the bean-picking areas in Broward and Palm Beach Counties for the purpose of advising farmers what the law requires of them. Most farmers already know what the legal hiring ages are because, he pointed out,

investigations have been made in prior years. For others not familiar with the law and regulations, he recommended that each secure a copy of the Labor Department leaflet on Child Labor.

While there are no restrictions on employment of children 16 and over, it is necessary for the farmer to obtain proof of the minor's age from the local county school officials, and keep a record of the young person's age and home address.

Christian Science Group Of Canal Point

God's great healing and saving power will be brought out at Christian Science services this Sunday. Scriptural selections will include the following from Matthew (15-30): "And great multitudes came unto him, having with them those that were lame, blind, dumb, maimed, and many, others, and cast them down at Jesus' feet; and he healed them."

Subject of the Lesson-Sermon is "Soul" a word which, when capitalized, is used in Christian Science as one of the synonyms for God. Passages to be read from "Science and Health with Key to the Scriptures" by Mary Baker Eddy include the following (21:10-16):

"Knowing that Soul and its attributes were forever manifested through man, the Master healed the sick, gave sight to the blind, hearing to the deaf, feet to the lame, thus bringing to light the scientific action of the divine Mind on human minds and bodies and giving a better understanding of Soul and salvation."

Avon Park Site To Cure Drunks

AVON PARK—State Cabinet officials participated in the dedication of the new Florida Alcoholics Rehabilitation Center here recently with State Treasurer J. Edwin Larson presenting the dedication address.

Authorized by the legislature of 1953, construction on the center was started early in 1955. It was turned over to the board of commissioners of state institutions last May and at the present time has 23 patients.

Among other dignitaries present for the dedication ceremonies was State Attorney General Richard W. Ervin who presented greetings from the board of commissioners of state institutions; Secretary of State Robert E. Gray, State Comptroller Ray E. Green, and Dr. Ernest A. Shepherd, administrator of the state alcoholic program.

Larson, in his dedicatory address, praised the efforts of former Representative Edna Pearce and State Senator Doyle E. Carlton, Jr., who were instrumental in gaining legislative approval of the facilities.

Flood Work Needs Congress Money

WEST PALM BEACH—New construction on central and southern Florida flood control project works can begin with appropriation of \$15 million during the present session of Congress, it was reported today. With the Senate Public Works subcommittee for Flood Control in recess, the status of the 1957 flood control bill now before it remains undecided.

According to W. H. (Bill) Hitt, vice-chairman of the flood control board, construction in the Everglades, conservation areas, the northwest Okeechobee-Istokpoga area and on the Kissimmee can get underway in fiscal year 1958, if funds are appropriated. Such funds can become available only upon enactment of the Flood Control Act and subsequent appropriations legislation.

Among works scheduled for new starts in the central and southern Florida district are Levee L-38 forming the western boundary of Conservation area No. 2, and pump station S-8 at the conservation area end of the Miami canal.

Construction to improve the Harney Pond and Indian Prairie canals on the northwest shore of Lake Okeechobee and to start work on canal C-41-A to bring a degree of immediate relief to annually inundated areas there is planned. A structure in the Istokpoga canal designed to store water for use in that rich truck-farming area is included in Flood Control District plans.

A start in flood relief for the entire Kissimmee valley can begin, as well as work in Cypress creek canal outside Pompano Beach, if funds become available.

J. Adney Cox, Princeton, is chairman of the District board which includes David G. Click, Kissimmee; Brian K. McCarty, Fort Pierce; Clarence L. Thacker, Kissimmee; and Hitt, West Palm Beach, Florida.

Turnpike Turns In A Lotta Cash

MIAMI—Florida's new turnpike seems to be surpassing expectations and bringing in views of optimism from the bankers, says Thomas B. Manuel, chairman of the Turnpike Authority.

Manuel said the average income from the Sunshine State Parkway during its first week of operation was \$12,000 daily. Compare this with the \$10,000 a day necessary for operating, maintenance and bond interest payments, and the picture looks good.

Bankers and bond house officials are watching the revenue closely on the parkway to determine the feasibility of a state-long turnpike and the saleability of bonds necessary to finance it. The bankers say the start of the Sunshine Parkway was better than almost any other turnpike in the country, and they seem to be optimistic.

Passion Play At Lake Wales

LAKE WALES—The Black Hills Passion Play opened its fifth season last Sunday in the natural amphitheatre with performances set for Sundays, Tuesdays, Thursdays and Saturdays. Closing performance will be Easter Sunday, April 21.

Said to be the oldest passion play in the world, the Black Hills Play originated in Luenen, Germany. It moved to the Black Hills of South Dakota in 1932 to escape Hitler's reign of terror and in 1953 inaugurated a winter season in Lake Wales.

The play, which covers the last seven days Christ was on earth, requires more than 500 costumes, many filled by townspeople of Lake Wales. Also required are live camels, donkeys, sheep, white Arabian horses and fantail pigeons.
